

Quick, clean, quality sealing

Often referred to as plumber's tape, Teflon® tape or thread sealant, PTFE tape is a simple yet effective material found in trade toolkits worldwide. It's generally used as a sealant and lubricating material, perfect for installing fittings in the kitchen and bathroom. NCS premium tapes are the professional choice for sealing that resists cracking, wear, galling, corrosive chemicals, and weather. Our premium thread seal tapes are manufactured in the USA from 100% pure virgin DuPont™ PTFE resin and we offer the industry's widest selection of customization options and a wide range of packaging and labeling options. NCS tapes form a self-lubricating bond, which makes assembling and disassembling pipes easy while significantly extending the useful life of the connection. We offer density grades to meet every need — from general purpose and plumbing to laboratory, military, chemical, and food processing applications. Our UL listed thread seal tapes can be certified to the highest industry standards to meet even the most demanding applications.

- American Made
- 100% PTFE Resin
- UL Listed
- Chemically Inert
- Non-Toxic
- Non-Flammable
