

## Protect your workforce

Protect your face from pathogens, fluid sprays, chemicals, debris, or dust/dirt with North Coast Seal's Face Shield Solutions designed with workforce safety in mind. NCS's Origami face shields are for disposable single-use applications. By leveraging this new design, NCS is helping reduce face shield costs, waste, lead times, logistics, and inventory complexities for this critically-needed personal protective equipment.

**Lightweight | Single Use | Anti-fog | Easy Assembly**  
*Material Composition: 100% PET (polyethylene terephthalate)*

### Enhanced Protection & Performance

- Protect full face from airborne pathogens & contaminants with clear field of vision
- Made of non-porous PET
- Use concurrently with other PPE
- Lightweight for reduced user fatigue
- Does not restrict breathing
- Prevent users from touching face to mitigate cross contamination
- Anti-fog to prevent moisture blocking visibility
- Label for personnel ID or personalization
- Single use reduces cross contamination risk

### Accelerate Availability & Replenishment

- Single use removes time consuming disinfection & sterilization processes
- Fast & easy assembly in high paced environments
- Two piece construction: integrated shield & crown with adjustable headband
- Configurations reduce logistics complexities & lead time
- Can be 100% sourced & manufactured in region for fast local supply agility in NA, EU or APAC

### Cost Effective

- Cost efficiency enables disposable, single use
- Efficient packaging reduces logistics & storage costs: 30K shields store in 1 cubic meter
- Disposable use eliminates disinfection & sterilization costs 100% recyclable reduces landfill refuse & waste management costs
